2009

*The Third IEEE International Conference on Space Mission Challenges for Information Technology (SMC-IT) is the first forum to gather system designers, engineers, scientists, practitioners, and space explorers for the objective of advancing information technology for space missions. The forum will provide an excellent opportunity for fostering technical interchange on all hardware and software aspects of IT applications in space missions. The conference, held in the beautiful city of Pasadena, California, will focus on current IT practice and challenges as well as emerging information technologies with applicability for future space missions.*
