SMC-IT 2021

8th International Conference on Space Mission Challenges for Information Technology

Online - July 26-30, 2021

Corporate Sponsor Package

About SMC-IT

Since 2003, SMC-IT has gathered system and software engineers, scientists, system engineers, and leaders in the space industry for the purpose of the most advanced ideas in the area of space information technology (IT).

The conference is sponsored by the IEEE Computer Society and the Technical Committee on Software Engineering and is well-attended with a broad cross-section of the space community as well as many international attendees.

As in our past conferences, we are providing an opportunity for companies to partner with us as "Corporate Supporting Donors". This allows companies to combine their attendance while being prominently featured over the 5-day event. SMC-IT Corporate Supporting Donors will have the opportunity to choose from having their own speaking slots, mini-workshops, training classes and other special incentives.

Corporate Donors

- **Silver: $1,500**: Includes 3 Registrations. Company logo on the website and the link to a promotional white-paper, and attendee mailing list.

- **Gold: $2,500**: Includes 4 Registrations. A timeslot reserved for noon-time sponsored talks, company logo, link to promotional material, and attendee mailing list.

- **Platinum: $3,500**: Includes 5 Registrations. Daily breakout room for targeted talks and a timeslot reserved for noon-time sponsored talks, company logo, link to promotional material, and attendee mailing list.

Speakers

Rob Manning, Chief Engineer for JPL's Engineering and Science Directorate

Eugene L. Tu, NASA Ames Center Director

Anik De Groof , Solar Physicist for the European Space Agency (ESA)

**Tim Canham,** Software and Operations Lead for Mars Helicopter for NASA/JPL

Janet Grondin, Vice President of Defense Programs for Stellar Solutions, Inc
